

## CHAPTER 6

# DEVELOPING UNIQUE PERSONALITY

*"The mind is everything for our control,*

*What you want, that you become*

*People laugh at you because you are different*

*And you laugh on them because they all are same"*

Everyone is unique in this universe not only by DNA but also means of appearance and thinking. Now here a question rises,

Do you want to become like everyone else or unique?

Hardly there might be anyone who wants to become like everybody else but everyone wants uniqueness within themselves whatever their field of interest. Now again thing is that can everyone become unique with their past experiences.

If yes, then what to do to achieve this uniqueness?

Definitely, there is a path to follow for achieving the uniqueness which implies hard working, smart working, discipline life, follows by great personality who struggle in life, fight with problems and work hard to achieve their goal. Now let us discuss different aspect of uniqueness.

To bring the uniqueness within yourself is a long and slow process it cannot achieve within one day/one month/one year but it is the game of life that needs a good discipline life. Here discipline life signifies that you should do everything in life but the limit should not be crossed, the time for any task in life should not be given more than it requires.

It can be illustrated by one example if your exams are going on and you are wasting time playing video games, watching a moving, enjoying with friends instead of studying. But the need is to concentrate on the book so that you should be well prepared for exams. Life is not only about the completion of the task but also need precise time management for it.

Everyone should know about the thought "life is full of variation". There are "up and down" in life like hill and valley many people are frightened by the down or problems but you should have strong courage to

## *THE MELANGE OF SUCCESS*

fight with such little or by adverse circumstances. If we see ECG (electrocardiograph) it shows a person alive when graph have ups and downs but when it starts moving straight than it indicates death.

So try to understand the real meaning of life. Real-life is that which makes a person experienced and struggler which later fills life with a color of joy and amusement.

### **LEARN AND GROW**

We should follow the concept of “learn then grow” but I strongly recommended the law of “learn and grow simultaneously”. If you immediately take the reaction on action definitely help you in better understanding. Love the failures more than success because failures teach you a new lesson of life.

If you stop now and start again this span of time between the start and stop just wastage of time which can never be regained. If today you afraid by a problem your efficiency of performance will be decreased but if you want success then the fact is that success never comes to you but you have to go towards it to achieve it. Try to understand the fact and follow it.

In this world you came alone then definitely you will also leave this world alone. So live this small span of life with your friends by sharing our experiences with each other and learn from them. There is no need to be suspicious about someone. Once someone starts ignoring you it becomes difficult to regain him/her faith. Always believes in your friends, relationship, parents, and others until or unless they give you a reason to not do so. Because it takes a lot of time to win someone faith and heart but due to a single mistake and within a few seconds you will lose faith of others who trust you. The building faith takes a long time and several reasons but to destroy it one reason is sufficient.

One who becomes unique and inspires others have some qualities like time management, concentration, confidence, safeguard, having control on mind during dejection, flexible with time all these are the things which make them a unique personality. We have already discussed the qualities in previous now need is to follow it.

Now let us move on hardworking and smart working successful people prefer both hard as well as smart work but their focus on smart work. Undoubtedly smart work makes your life simple, easy and technical as well. If you want to become a singer follow and listen to the singer if poet that read and write poems think and know more about others poet if you choose to engineer your thinking capacity should be outstanding and you will be interested to listen to and watch videos of new technology the message is simple and clear what do you want to do in your life follow to people who are related to it and move on with your hard-working. Live in such an environment that can help you to achieve your aim.

In this world, there is no one who does not have problems everyone suffers from the problems but the way of dealing with them makes you unique. “All the wealth generated would be meaningless when the person is not able to enjoy and celebrate the life”. Evaluate your needs, your life, your wisdom you find variation and improvement by comparing yourself to the past. Judge nature of others you learn from them what virtue they possess by keeping ago aside. For becoming a unique your health also plays a vital role in your life for developing unique character.

### **HOW IMAGINATION MAKES YOU GREAT**

If you have the tendency of imagination, your mind will be creative, creativity increases the power of thinking if you think more you will acquire the knowledge, whereas knowledge give rise to innovation and innovation makes you great.

### **HEALTH**

One should also always physically fit by maintaining daily routine which includes proper diet, gym, yoga and other works which make and improve your looks as well. If possible you must also give time for gym about 5 days in a week and every day 1 to 1.5 hours for your body the consequences of this hard work your body will lose wastage material in form of sweating which release fat and brings glow at your face and makes you strong. Health as not ends with gym, but also requires proper maintenance of diet, so that you can get optimum benefits of the gym actually gym and diet both are well synchronized 100% gym also required 100% diet to get the best efficiency and optimum results. So guys, not only focus on knowledge but also on health because it decides activeness enthusiasm of body.

Friends live your life normal and enjoy with a friend like everyone do so but when the time comes to do something different then your deeds, works should be unpredictable, unexpected, presented yourself in such a way that everyone looks after you and you become a point of attraction and concentration and everyone becomes shocked by you.

A successful person not only speaks but also listens to others carefully for getting knowledge when you got three things in your life health, wealth and publicity definite you become a unique personality with unique character and culture vest within you.
