

CHAPTER 7

ACCOMMODATION PROBLEMS

"Instead of changing the world

It is easy to change yourselves

If you accommodate at new place fast

Less time need to win the place"

-CHANAKYA

The accommodation problem is one of the great problems for the students. Students feel uncomfortable when they have to move from one place to another. Due to changes in climate, food, conditions, homesickness, Hostel Problem, uncomfortable environment in P.G. and many problems related to accommodation. These problems starts when we move out of our city either for the job, higher studies or for other works.

But if we think quite deeply when a student goes for preparation of some competitive exams like IIT, Medical, CLAT, CA(charter accounts) and other competitive examination in different parts of the nation.

If we take the example of Kota in Rajasthan which is the hub of study for medical and non-medical students, it is one of the hottest places in India. It is difficult for a student of south and east India to adapt such climatic conditions but finally, they do it by adjusting themselves within weather conditions, not only stay there for some years but also got selected in IIT/Medical whatever their aim. These students are a great inspiration for us and give a message we can live anywhere the only thing is we have to concentrate on our aim.

The problem of accommodation is the perception of the mind, just think about that man who sleeps on footpath during winters. But many students having cooler and air conditioner during summer and room heater during winter apart from this they complain to their parents about the problem of living in a different climate zone. This shows that their problem is not of accommodation but the problem is something else which is pretended in the form of accommodation. Actually, one who is looking for big dreams is used to facing such little problems. You are also required to be physically strong and adapt yourself to each and every type of environment.

HOSTEL OR P.G.

Students are in dilemma either go for Hostel or P.G. (paying guests) and are unable to take proper decisions and take suggestions from many people for selecting one of them. You are living in a hostel or P.G. does not matter.

THE MELANGE OF SUCCESS

But you are in the hostel during college time you get some template like a good meal at the proper time, maintaining good health by using gym facilities, the library is also available over there which provides you the benefits in many aspects but depends on you how to use it. Newspapers of different types, so many magazines are available, every type of book, even if you are a student of engineering side by side you can prepare for civil service exams. The main role of the library to increase the depth of knowledge and it is available to you anytime. The only problem which is faced by the hosteller is the time limit. On another hand, in P.G. the only benefit is we can take tuition of some particular subjects and also can be in contact with city life.

The next problem is related to the food, students of north Indian faces problem in south and south Indian in the north similarly in east and west. But when we go abroad we also face the same problem but to achieve something we have to lose something.

STORY OF LORD RAMA

With the inspiration of Lord “Rama” who got the little lord “Shri Rama” after 14 years of exile in the forest and meanwhile he lost his wife and brother both. Ultimately after a lot of struggle, he wins the whole empire of Ravan and back to home so-called Ayudhiya.

Similarly, there is some little problem of food stock be managed by you itself. Go to the market once a week and enjoy your favorite dishes. And for the rest of 6 days mainly the hostel or P.G. foods.

Actually, those things which do not attract us and look more marvelous and beautiful. And we approach for it instead of seeing its advantages we focus on disadvantages. When we come out of our home to study and move further in a different part of our country and abroad the first and foremost problem we face is accommodation. Which include living and food. If we are living in PG (Paying guest) we feel that life is monotonous because daily we are surrounded with same things like same markets, room, books make us irritated while on the other hand hostler are irritated with the same menu of food, crowded rooms (at economy level), stranger roommates but in conclusion, we find that everything has pros and cons. It is also noticed that living place and the living standard is not maintained by things or outer appearance but it is maintained by thinking out of the box, maintenance, concentrating and focus on our goal and take away our mind from these little and meaningless things because these things can give you comfort for little time but your great thinking can take you a unique platform.

Students should not only be confined to study only in one particular country but also go abroad to learn many cultures, living standard, lifestyle, their thought, study and observe the problem of that country, get the knowledge of the particular subject for which the country is known, visit all landmarks and be adventurous. But the question is how we go and when we have to go.

You can go for higher studies, training, internship, winter, and summer vacation camps and many universities have international collaboration and partnership with some countries which help you a lot to become part of a semester exchange program. Even some students who are not economically so strong. There are some universities that provide a scholarship for living and food, but the important thing is your capability to adjust yourself over there and manage your heart and mind in control way.

THE MELANGE OF SUCCESS

Next thing about which many of us bother. How to manage roommates. Should live alone in a room. Actually it depends on your objective of living if you are preparing for any competitive exams like CGL, IIT, SSC, NDA, CDS and any other It is better to live alone in a room without sharing but if you are living in college than share room with roommates because it is time to learn about the life rather than academic.

Actually, depending on the nature of the person we take the decision. Everyone wants different facilities, living standard and many more. But sharing a room judge your adjustment capability, managing power, behavior but also losses our privacy. Because 90 % of our thoughts will we expose to your roommates. But if a roommate is well-wishers then it will be a great gift for you because their support and help will never allow you to deject and distract in life.

Never trust anyone in a single meet unless you did not know about them.

How can you trust them in a single meet?

Love those who love you and love more those who hate you but never trust on your haters it is said that once you live for a long period of time in a particular environment then you will also start behaving like that. Keeping one thing in mind never miss even a single movement of enjoyment in life whatsoever playing, friends, academics, literary, theater, traveling visit disco for enjoying night because every experience of life is important but never become addicted to anything. Because once you addicted to something then someday that thing will be your weak point. So do what you want, what you love, make your own decision as it will be final
